LIPOSELECTION ONLY BY VASER

The most modern in Body contouring technology. VASER combines patented technologies with advanced surgical techniques to precisely sculpt the body by removing unwanted fat deposits. LipoSelection only by VASER uses ultrasound waves to break up and remove fatty tissue while leaving other important tissue relatively intact. By minimizing damage to other tissue, patients experience excellent results, including smooth and tight contours with low to minimal pain and low to minimal swelling and bruising.

**In an independent peer-reviewed published study involving the treatment of 77 patients with the VASER® System [Jewell, Mark Lawrence, MD; Fodor, Peter Bela, MD; De Souza Pinto, Ewaldo Bolivar, MD; Al Shammari, Mussab Abdulrahman, MD. "Clinical Application of VASER-assisted Lipoplasty: A Pilot Clinical Study" (2002, March). Aesthetic Surgery Journal 22(2), 131-146], three plastic surgeons reported low to minimal post-operative pain, bruising and swelling as well as no complications, no need for re-treatments, and both patient and surgeon satisfaction*

The following are pricing guidelines for various aesthetic surgery services performed by our accredited Cosmetic Surgeon. These pricing guidelines are based on average procedure costs and include **Doctor's fees (Surgeon, Anesthesiologist), Medical clearance (when necessary) and laboratory tests (if needed), Hospital fees, Operating room charges and room night (if necessary) where applicable, take home antibiotics and pain-relievers.** The currency of prices listed below are in Philippine Peso. These prices are for planning purposes only. Final charges may vary depending on the final analysis of the physician in charge.
